

CALL 2027

INCOMING INTERNATIONAL MOBILITY SCHOLARSHIP PROGRAMME FOR JOINING THE SPACE ACADEMY OF ÎLE-DE-FRANCE

Overview

The Space Academy of Île-de-France relies on the academic and industrial ecosystem located in Paris area, via university research laboratories and companies that are historic leaders in Space science and technology.

The objective of the Academy, created in 2023, is to consolidate and to improve the offer and quality of training at undergraduate, graduate, and PhDs levels in the space domain, to meet professional needs in the field.

To achieve this, the Space Academy of Île-de-France promotes international mobility and offers grants for studying in master's degrees and for research internships at bachelor and master's levels.

Curriculum and research training programs conducted by the partners of the Space Academy (see Appendix 1) cover most areas of current interest in the field, including a wide range of theoretical, experimental, instrumental, and observational studies.

This ambition covers three topics of major strategic and economic interest for the Île-de-France Space Academy: (i) the management of space platforms and their debris, (ii) the development of the payload and the associated scientific exploitation of data collected from space, and/or (iii) the design of launchers, including reusable launchers and remote control.

Grants for Master and Bachelor's level students

The Space Academy provides incoming mobility grants for individually designed study and research projects at 3rd year Bachelor and Master's level. The topic of the academic and/or research project **should be directly linked with the space domain**, as described by the 3 main topics of the Space Academy listed above and related topics. The incoming mobility scholarships are opened to students **that have not previously studied in France at university level** and want to perform a Master in one of the formations of the Academie Spatiale d'Île de France. Support can be provided for one year (M1 or M2) or for two years (M1 & M2). In the latter case, the application must be resubmitted after the M1 and is pending, the second year, to both the quality of the results obtained over the course of the M1 and to the admission to a M2 of the Academie Spatiale d'Île de France. The incoming mobility scholarships are also opened to students registered in a Third year of Bachelor, or a Master in a foreign

University who want to perform a research internship during their formation in one of the research teams or laboratories of the Academie Spatiale d'Ile de France.

The grants are provided for the following two cases:

- ✦ Master students spending one academic year or one academic semester in a master program of the Space Academy (see examples in Appendix 2) will receive a monthly living stipend of up to 1200 € maximum. The amount of the stipend is fixed based on the official rules of each Space Academy partner. For 2-year cursus, one application per year is required. In the cases of existing exchange programs with one university of the academy, tuition fees could also be exonerated depending on specific conventions.
- ✦ Master and 3rd year Bachelor's students carrying out research projects in labs of the Space Academy partners will receive a monthly living stipend of up to 1200 € maximum. The scholarship provided by the Space Academy may be revised by the institution of enrolment, so that the total internship income (including other grants) does not exceed the mentioned amount or specific rules of the corresponding Space Academy partner. Moreover, no tuition fee is needed. The topic of the research project should be directly related to space missions and space remote sensing research fields and related aspects. The project could (although not necessarily) be linked with space campuses of the Space Academy (see Appendix 3).

Eligibility conditions and miscellaneous information

A specific attention should be paid to the following points about the eligibility of a given application:

1. Only students that apply for the 3rd year of Bachelor/Licence (3rd year at university) and for the 1st and 2nd year of Master's degree (4th and 5th years at university) are eligible. **The PhD students are NOT eligible to the mobility call of the space academy.**
2. The incoming mobility grants provided by the Space Academy of Ile-de-France **ARE NOT APPLICATIONS FOR ANY MASTER OR BACHELOR PROGRAM**. Application for a given master or bachelor program is a separate and independent step that should be done (or started) by the applicant before the space academy mobility grant application. The applicant to the space academy mobility grant should contact and ask for the support of the head of one of the Master programs (Appendix 2). Any application that does not explicitly specify the name of the Master program will NOT be eligible.
3. In the case of an application to an internship mobility grant within one of the laboratories of the space academy partner (Appendix 1), **the applicant should contact and ask for the support of the envisioned supervisor of his internship**. In addition, **an application for which the internship has started before it has been evaluated by the space academy may not be eligible depending on the host institution concerned by the application**. It is thus highly recommended to apply to the mobility grant a few months/weeks before the beginning of the internship.

4. Since the incoming mobility grants ONLY concern stays that are **EXCLUSIVELY LINKED WITH THE SPACE DOMAIN** (such as the observation of Earth or the Universe from satellite, the development of satellite and space technologies including sensors, platforms, launchers, etc), an applicant showing an academic background and a project that are NOT (or too far) related to the space domains will NOT be eligible.
5. **ONLY A SINGLE PDF FILE** named explicitly following the format indicated below including your last name should be sent to mobility@academiespatiale.fr. Therefore, any application that is sent using several files for your documents, CV and application form will NOT be examined.
6. The **academic transcript of the applicant should be provided** within the application.
7. The mobility grants offered by the space academy only include a monthly stipend. **The travel and flight tickets expenses are NOT covered.**

Applications

- ◆ Candidates should submit a statement of grant purpose defining activities to take place during their academic journey (one year or one semester) or during their internship (see the attached incoming international mobility Form).
- ◆ Candidates should apply for academic and research projects before one of the following **deadlines: 30 October 2026, 29 January 2027 or 28 May 2027**. Responses from the Academy are provided about 4 weeks after the deadline following the submission of the application.
- ◆ Firstly, your application will be evaluated by the Space Academy's International Mobility Committee. If the committee accepts it, it should be highlighted that **the final approval of the mobility grant is subject to acceptance by the head of your Master's program, the relevant department of your host institution at the Space Academy and for internships, also by the host research laboratory.**

Candidates should fill and save as a SINGLE PDF FILE including all requested documents: the Incoming International Mobility Form, CV and all annex documents as **SPACE-IDF-IntMobility-Incoming2027-Form_StudentName.pdf** (a single file, note that separate files are not accepted) and send it to :

→ mobility@academiespatiale.fr
